Cyberscience | driving business intelligence

Cyberquery has a data dictionary to describe the datasets users wish to access. This removes all the physical details of the file structure from each program and from the user/developer. The original target customers for Cyberquery were personnel departments, so ease of use by non computer specialists was an early design goal.

CyberQuery - Wikipedia

This is almost certainly a pointless post, as you've either figured it out by now, or forgotten about the post. But, since Cyberquery is almost a non-topic, I don't think they even have a forum, any noncommercial support, and there probably aren't many of us out there who have used it extensively, I'll toss a bit of help out there.
